Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Takahashi, USP 6,194,676.

Re clm 1, Takahashi discloses a lever apparatus comprising:

- A lever (3);
- A cover part (attached to 3) disposed on a based end portion of the lever (3), which includes a spherical-shaped outer surface and a thickness-reducing recessed portion formed on an inner surface side thereof (see Figure below);
- A mounting part (7) projecting from the inner surface of the cover part;
- A pair of fitting recessed portions (7a) formed in opposed side portions of the mounting part (7)
- A pair of shaft portions (8b)
- a lever support structure (8) including the pair of shaft portions (8b) with which the pair of fitting recessed portions are respectively rotatably fitted.

From Figure 3 of Takahashi

Re clm 2, a pair of openings (7a) respectively formed in peripheries of associated shaft portions. Character 7a is a recess designed to house character 8b see C7-8.

Re clm 3, an inserting opening (in between 8e and 8d, see Figure 3) to which the mounting part (7) is inserted is formed in the lever support portion (8), and the pair of shaft portions project toward the inserting opening (8b).

Re clm 4, the lever support portion (8) is configured such that when the mounting part (7) is inserted into the lever support portion (8), the pair of shaft portions (8b) abut the mounting part (7) and wherein the shaft portions (8b) are able to be elastically deformed.

Response to Arguments

3. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Particularly pertinent is USP 2,342,402 by Jakeway, which additionally discloses a lever support.
